

EXP 10 :

Use the following requirements for a Library Management System:

- Add a feature to search books by title and author.
- Implement an online book reservation system.
- Generate monthly reports on borrowed books for administrators.
- Enable email notifications for overdue books.
- Add support for QR code scanning for borrowing and returning books.
- Create a user-friendly dashboard for librarians.
- Allow users to review and rate books.
- Integrate a chatbot for user assistance.
- Develop a mobile app version of the system.
- Provide multi-language support.

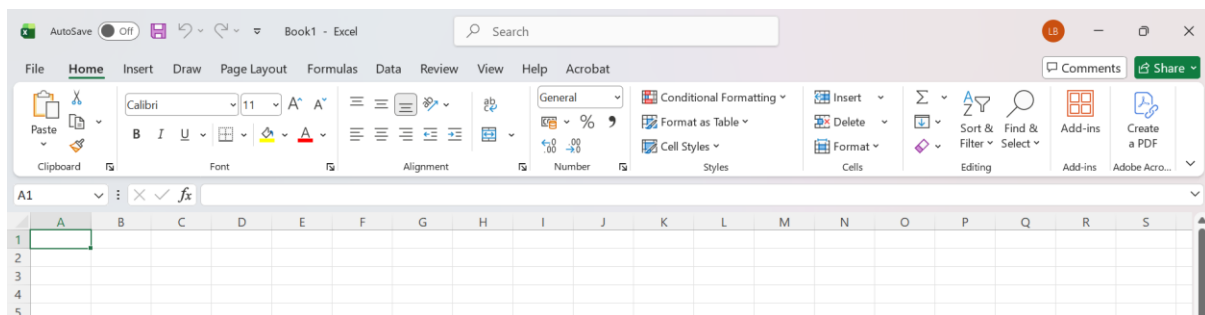

Categorize each requirement using MOSCOW Method (Must-Have, Should-Have, Could-Have, or Won't-Have) based on the following criteria:

- Impact on the users and stakeholders.
- Feasibility considering time, budget, and resource constraints.

Finally Submit the completed Google Sheet or Excel file with all requirements categorized and justified.

Workflow:

Step 1: Open Microsoft Excel, Click Blank Workbook.

Step 2: Create the Headers

In the first row, enter:

Cell	Text
A1	Requirement
B1	MoSCoW Category
C1	Justification (Impact & Feasibility)

Requirement	MoSCoW	Justification
-------------	--------	---------------

Step 3 : Enter the Data

	A	B	C
1	Requirement	MoSCoW Category	Justification (Impact & Feasibility)
2	Search books by title and author	Must-Have	Essential feature for finding books quickly. High impact and easy to implement.
3	Implement an online book reservation system	Should-Have	Improves user convenience but is not essential for the first version.

Step 4 :

Format the Table

1. Select **A1:C11**.
2. Click **Home** → **Format as Table**.
3. Choose any table style.
4. Click **OK**.

	A	B	C
1	Requirement	MoSCoW Category	Justification
2	Search books by title and author	Must-Have	Essential feature for finding books quickly. High impact and easy to implement.
3	Implement an online book reservation system	Should-Have	Improves user convenience but is not essential for the first version.
4	Generate monthly reports on borrowed books for administrators	Must-Have	Required for library management and decision-making. Easy to generate using database records.
5	Enable email notifications for overdue books	Should-Have	Helps users return books on time. Moderate implementation effort.
6	Add support for QR code scanning for borrowing and returning books	Could-Have	Speeds up transactions but requires QR scanner integration.
7	Create a user-friendly dashboard for librarians	Must-Have	Essential for librarians to manage books and users efficiently.
8	Allow users to review and rate books	Could-Have	Increases user engagement but is not necessary for core operations.
9	Integrate a chatbot for user assistance	Won't-Have	Useful but not a priority due to higher development cost and time.
10	Develop a mobile app version of the system	Could-Have	Improves accessibility but can be developed after the web system.
11	Provide multi-language support	Should-Have	Makes the system accessible to more users but can be added after core features.

Step 5 : Save the File

Library_Management_MoSCoW.xlsx
