

26.Clone an existing GitHub repository to your local machine and make a small change in one of the files.

Tasks:

- Choose an existing public GitHub repository (e.g., your own or a sample repository).
- Clone the repository to your local machine using git clone .
- Navigate into the cloned repository directory and open one of the files.
- Make a small edit, such as modifying a line of text or fixing a typo.
- Save your changes.

Step1:Open an existing public repository in github

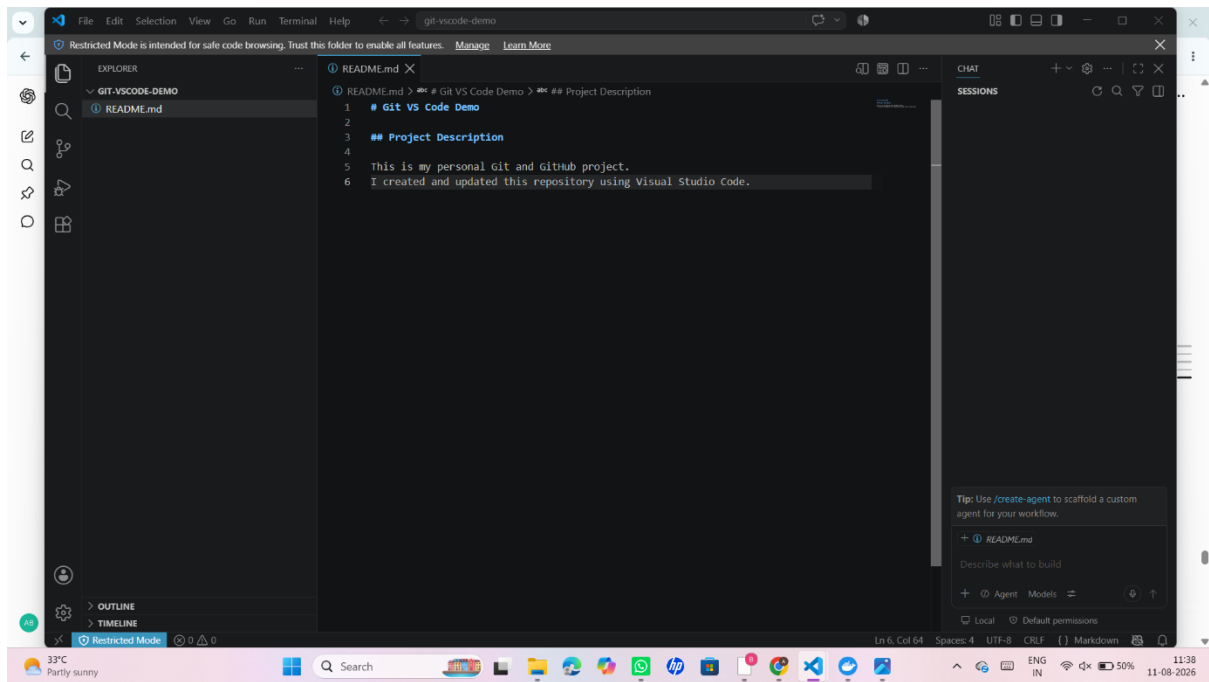

Step 2:Open vs code and open new terminal and clone the repository

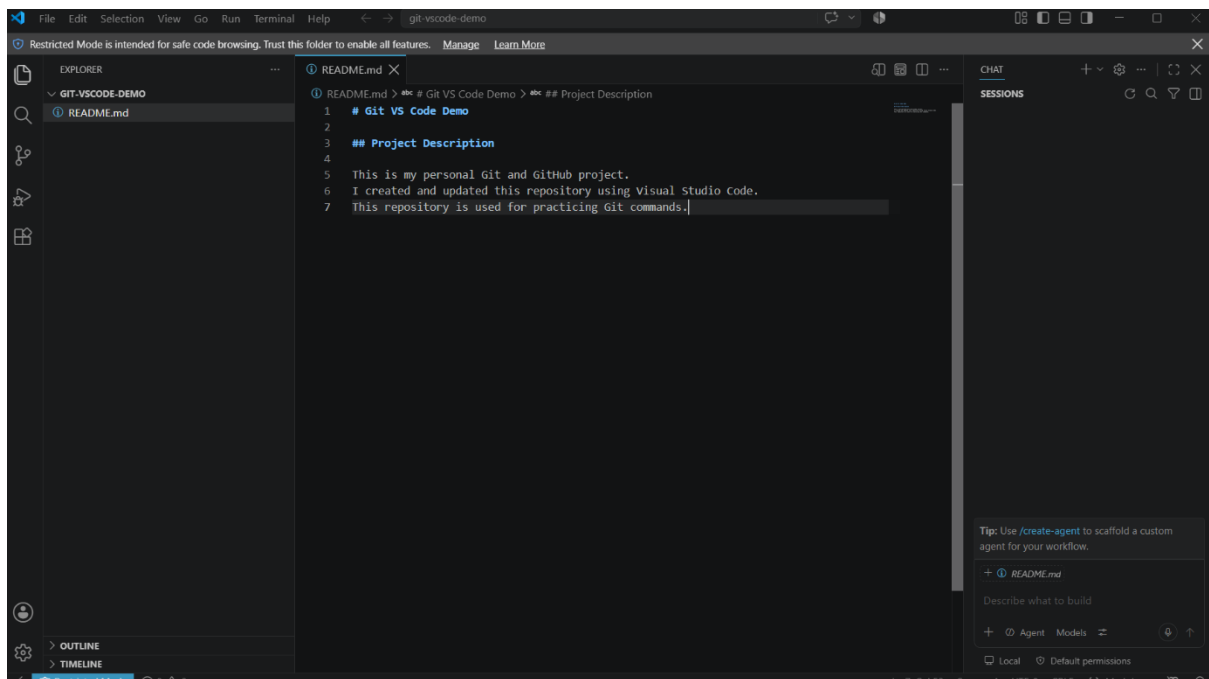

```
Start Walkthrough
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

PS C:\Users\Bhavya> git clone https://github.com/bhavya13139/git-vscode-demo.git
Cloning into 'git-vscode-demo'...
