

27. After modifying a file in a cloned repository, commit the changes locally and push them to GitHub. Tasks:

- Clone a repository (from question 1).
- Modify a file (e.g., README.md).
- Stage the changes with `git add`.
- Commit the changes with `git commit -m "Updated README"`.
- Push the changes to GitHub using `git push`.

Step1: Open an Existing Repository

Step 2: Open vs code and open new terminal and open repository

```
PS C:\Users\Bhavya> cd C:\Users\Bhavya\git-vscode-demo
PS C:\Users\Bhavya\git-vscode-demo> code .
PS C:\Users\Bhavya\git-vscode-demo> git status
On branch main
Your branch is up to date with 'origin/main'.

Changes to be committed:
  (use "git restore --staged <file>..." to unstage)
        modified:   README.md

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   README.md
```

Step3: Open the readme.md file

Step 4: Make a small changes

Step 5: check the status

Step 6: Commit and push the file into github

```
PS C:\Users\Bhavaya\git-vscode-demo> git commit -m "Updated README"
[main 53e3ef2] Updated README
 1 file changed, 3 insertions(+), 1 deletion(-)
PS C:\Users\Bhavaya\git-vscode-demo> git push
